

Lab Exercise 3

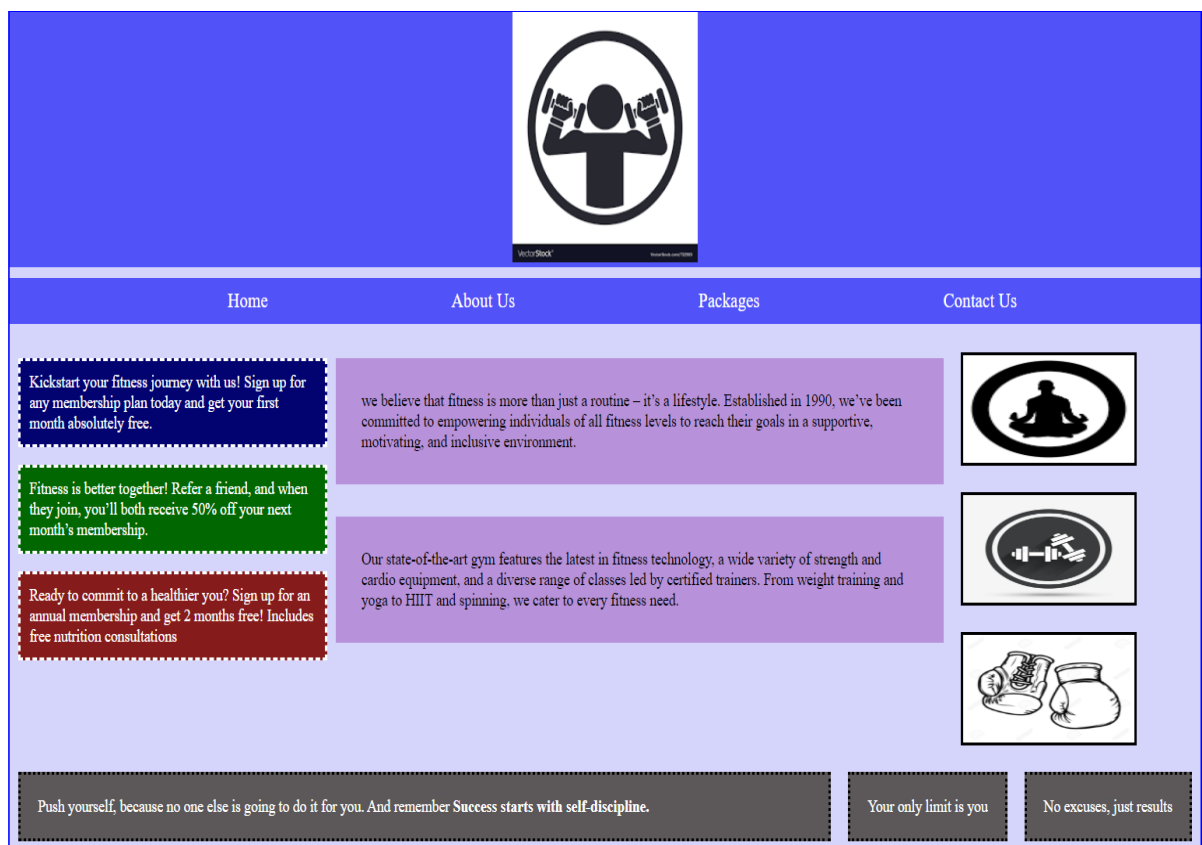

Lab Exercise:

Please follow the steps below to ensure your project is properly organised:

- Navigate to your designated lab section on D2L.
- Download the provided *Starter* folder.
- The downloaded *Starter* folder contains two **HTML files: index.html and page2.html**.
- After downloading the folder, reorganise its contents into the following sub-folders:
 - **HTML**: Place the index.html and page2.html files in this folder.
 - **CSS**: Create this folder for your project's stylesheets.
 - **Images**: Use this folder for any images that will be used in your project.
- Ensure that your project maintains a clear and proper folder structure with the sub-folders named **HTML**, **CSS**, and **Images** for ease of access and organisation.

Open the HTML File:

- Locate and open the index.html file.
- Apply external CSS to style the elements as shown in the reference screenshot.
- The necessary HTML code is already provided in the *Starter* folder. Your task is to focus solely on styling the webpage.
- Set the body width to 80%.
- Use margin: auto; to centre the page horizontally.
- The navigation bar, which includes links such as "Home," "About Us," "Packages," and "Contact Us," should be styled using Flexbox.
- Apply Flexbox to the main section of the page which contains (asides and divs) .
- Use Flexbox to style the footer.

Page 2

- Work with the page2.html file.
- Apply the same external CSS style sheet that was used for the previous webpage (index.html).
- Any specific overrides to the styling should be handled through the internal style sheet within page2.html.
- Use Flexbox to style the main section of the page.
- The child section, which is nested inside the parent section which contains the images, should also be styled using Flexbox.

Submission:

1. When you finish, show your work to your instructor before you leave.
2. Zip your files and submit the zipped file to the dropbox on D2L.
